ESPECIFICACIONES DE SIEMBRA

Índice de Siembra
1 lb. por 20 pies cuadrados (mezcle 4 x 9 pies)

El Programa Calzar
Mil por cuadrados (área de 4 x 10 pies)

Profundidad de Siembra: 1/4"
Tolerancia al Tráfico: Buena
Germinación de Plantas: 7-21 días
Tolerancia a la Sequía: Muy Buena
Luz Requerida: Pleno Sol a Sombra Parcial
Altura de Corte: 3-4"

Césped Denso Y Hermoso – Garantizado!

1. PREPARE
Remueva todos los desechos, después rastrille para aflojar el terreno y nivelarlo la capa de arriba.

2. APLIQUE
Propague la mezcla de semillas no más de 1/8" de profundidad en cualquier área donde desee obtener un césped sobre todo verde y frondoso.

3. RIEGUE (El Paso Más Importante!)
Mantenga el suelo húmedo. Riegue diariamente dos veces al día una necesidad hasta que los retoños alcancen 1-4" de altura. La cobertura cambia a un color verde oscuro cuando está regado apropiadamente. Una vez que estén verdes, hay que agregar más agua.

CENTRAL

PLANTING SPECIFICATIONS

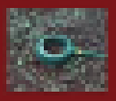
PLANTING RATE: 1 lb. per 20 sq. ft. (4 ft. x 5 ft. area)
PACKAGE COVERS UP TO: 40 sq. ft. (8 ft. x 10 ft. area)

Planting Thickness: 1/8"
Seedling Emergence: 7-21 days
Light Required: Full Sun to Partial Shade
Traffic Tolerance: Good
Drought Tolerance: Very Good
Recommended Mowing Height: 3-4"

Thick, Beautiful Grass - Guaranteed!

1. PREPARE
Remove debris, then rake the soil to loosen and smooth the top layer.

2. APPLY
Spread seeding mix no more than 1/8" thick everywhere bare, bare (fill of grass is desired).



3. WATER (Most Important Step)
Keep the soil moist! Water daily (twice a day if you have to) until grass sprouts and reaches about 3/4" tall. Mulch turns darker green when it's properly watered. If it's light green, add more water.

ADDITIONAL CARE TIPS

- Once your grass is 1/3 taller than the recommended mowing height you may begin mowing it.
- Avoid removing more than 1/3 of the total grass blade length at any single mowing to keep your grass thick and beautiful.
- Increase your mowing height in summer months to reduce grass stress.

IMPORTANT: Applying weed control products to grass prior to seeding can affect the seeds' ability to grow. Be sure to read and follow all manufacturer's recommendations and application instructions prior to applying any weed control products and prior to seeding. Additionally, do not apply any weed control products to newly seeded areas until the grass is established and has been mowed at least 3 or 4 times. Once newly seeded areas are established, you can begin a regular feeding schedule.
